

Premium Sunny Brand Lawn Mixture

(5 & 25 lb. Bags / Planted @ 4-6 lbs. per 1000 sq. ft.)

Versatile, tough and attractive. This mixture will respond well to a medium to low maintenance schedule of fertilization and grooming, plus gives you the drought tolerance where lack of moisture may be a problem.

Kentucky Bluegrass(60%)- This species has been selected for color, durability, and economy.

Bluegrass is very durable, bounces back well from drought and heavy traffic. Bluegrass spreads through underground rhizomes to develop a thick, tough, root system, and requires moderate care to maintain its beauty. Approximately 21 days to germination.

Fine Leaf Perennial Ryegrass(30%)- This species has been selected for emergence, endurance and versatility.

Ryegrass has the ability to produce a tough turf that resists wear and tear, recovers rapidly from damage, and increases the versatility of lawns for recreational purposes. Vigorous root growth penetrates even compacted soil and makes these grasses ideal for overseeding old and thin lawns. Approximately 10 days to germination.

Creeping Red Fescue(10%)- This species has been chosen for its hardiness and durability.

Fescue is used extensively in lawn mixtures, for its ability to produce in shaded areas. Fescue spreads by underground runners and makes a good, uniform sod. It does well on most types of soil, maintains a good color, and can withstand wear. Approximately 14 days to germination.

Recommended usage: Lower maintenance, new construction or anywhere that receives more than 50% direct sun per day. Same, generally, as the Elite brand except seed varieties selected are not as maintenance free. Economical.
